

Introduction

In this assignment I will be planning the design of a mobile app for teaching young children the alphabet.

The user requirements and the intended purpose of the app is to appeal to children ages 3-7, The intended purpose is to teach children the shapes and sounds of the alphabet in an entertaining way without any punishment for getting it wrong to not deter children from negative feedback. Due to the target audience the app will have a simple design and navigation.

Screen name: Screen1	
	Assets
	Title.png Start.png
	Notes on design/Alternative design
	Made to be simplistic for easy understanding in young children. • Children's letter music could be played while on this screen. • The Start button can be animated to appeal to its target audience.
	Events
	When the start button is pressed the next screen is shown.
	How does this meet the user requirements?
	The design is simple to keep it easy for kids to understand, the start button and title screen will also be colourful and pop out to meet the user requirements for age.

Screen name: A

Canvas A

Speak

Reset

Next

Preset colours and sizes that can be chosen

Assets

A.png
A.mp4
speak.png
reset.png
next.png

Notes on design

Buttons are large with pictures to show what they mean. Like next being a big arrow, speak being a speaker icon and reset being a cloth icon.

- The buttons could be animated when pressed.
- The letter could also show what they are used in.

Events

Speak replays the spoken sound 'A'(input and output). Reset removes all drawings(input). Next switch to the next letter 'B'(input). The presets list clickable colours and pen sizes to change the drawing colour(input).

How does this meet the user requirements?

The speak option will help children learn how to say the letter, and the canvas will allow children to draw over the letter to help them learn the shape, to help them learn the shape which meets its intended purpose of teaching children the alphabet.

Notes on design

Buttons are large with pictures to show what they mean. Like next being a big arrow, speak being a speaker icon and reset being a cloth icon.

- The buttons could be animated when pressed.
- The letter could also show what they are used in.

Events

Speak replays the spoken sound 'F'(input and output). Reset removes all drawings(input). Next switch to the finish screen(input). The presets list clickable colours and pen sizes to change the drawing colour(input).

How does this meet the user requirements?

The speak option will help children learn how to say the letter, and the canvas will allow children to draw over the letter to help them learn the shape, to help them learn the shape which meets its intended purpose of teaching children the alphabet.

Screen name: Finish

Complete

Return to start?

Assets

Complete.png
Retry.png

Notes on design

Simplistic like the start to give a clear meaning of what the buttons mean.

- The return to start button could be animated.

Events

When the return to start button is pressed it returns the screen to the start screen.

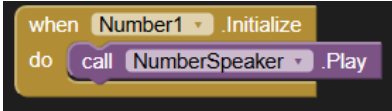

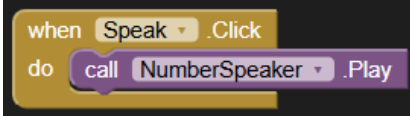

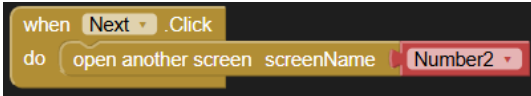

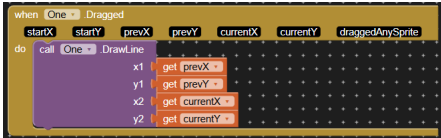

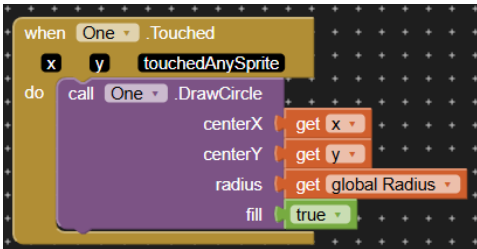

How does this meet the user requirements?

The design is identical in shape as the start and is also meant to pop out and be appealing to children, to meet the user requirement for age.

Description of asset	File Name	Source	Modifications made	Where used
The Icon of the app	Icon.png	Google drawings		Start and finish screen
A splash screen showing A-F that pops out with colour	Title.png	Language tool		Start screen
A brightly coloured start button	Start.png	Google drawings		Start screen
A brightly coloured speak button	Speak.png	Google drawings		All letter screens
A brightly coloured reset button	Reset.png	Google drawings		All letter screens
A brightly coloured next button	Next.png	Google drawings		All letter screens
Letter A	A.png	Flaticon A		A screen
Letter B	B.png	Flaticon B		B screen
Letter C	C.png	Flaticon C		C screen

Letter D spoken	D.mp3	TTSFree		D screen
Letter E spoken	E.mp3	TTSFree		E screen
Letter F spoken	F.mp3	TTSFree		F screen
A complete splash screen	Complete.png	Clipartmax		Finish screen

A colourful return to start button	Retry.png	Google drawings		Finish screen
------------------------------------	-----------	-----------------	--	---------------

Test Number	Screen	Test Description	Test Data (user input)	Result	Notes
1	All screens	Ensure any images load.	Open the app and screen.		
2	All screens	Ensure any sounds load.	Go past every page to get the sounds to play.		
3	Start	Ensure the starting button works.	Press the start button.		
4	Screens A-F	Ensure all of the next buttons work.	Press all of the next buttons.		
5	Screens A-F	Ensure all of the reset buttons work.	Press all of the reset buttons after creating a quick line on the canvas.		
6	Screens A-F	Ensure all of the speak buttons work.	Press all the speak buttons and listen for the sound.		
7	Screens A-F	Ensure all of the canvases work.	Draw a quick line on every canvas.		
8	Screens A-F	Ensure the pen size and colour can be changed.	Go through all of the preset colours and pen sizes and check if it changed on the canvas.		
9	Finish	Ensure the restart button works.	Press the restart button on the final screen		

Use	Image	Source
Can be repurposed for playing the sound of the letter when the screen is brought up.		NumbersApp
Can be repurposed for replaying the sound by a button press.		NumbersApp
Can be repurposed for changing the screens by pressing the next button.		NumbersApp
The canvas dragged script can be used identically as no changes are needed.		NumbersApp
The canvas touched scripted can be used nearly identically as the circle is created is double the size of the dragged line so a /2 math block can be used to correct this.		NumbersApp

Screen Name - Screen use name	Pseudocode
Screen1 - Start screen	If start button pressed display screen "A"
A - Letter A screen	If speak button pressed play the A sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "B" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size
B - Letter B screen	If speak button pressed play the B sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "C" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size
C - Letter C screen	If speak button pressed play the C sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "D" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size
D - Letter D screen	If speak button pressed play the D sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "E" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size
E - Letter E screen	If speak button pressed play the E sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "F" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size

Screen Name - Screen use name	Pseudocode
F - Letter F screen	If speak button pressed play the F sound If finger dragged on canvas draw a line If clear button pressed clear canvas If next button pressed display screen "Finish" If preset colour(1-12) pressed switch pen colour to preset colour If preset size(1-8) pressed switch pen size to preset size
Finish - Finish screen	If restart button pressed display screen "Screen1"
